

# Heated Tank Series

## Benchtop Cleaning Tanks

### Standard Features:

- All stainless steel construction
- 14 gauge 316L stainless steel tank, 304 stainless steel skirt
- High intensity 40kHz ultrasonics
- Powered by Neptune<sup>®</sup> C 40kHz generator with sweep frequency
- Metallurgically bonded transducers
- Thermostatically controlled heat
- Voltage: 120V or 240v, single phase
- Ultrasonic frequency sweep to enhance cleaning
- Uniform cavitation with rapid degassing

### Optional Features:

- Stainless steel basket & lid
- Digital cycle timer
- Pump and filter
- Overflow Weir
- 25kHz ultrasonic with vacuum brazed transducers
- Custom sizes to match your job

HT-3624 (240v)	52.4	36" x 24" x 16"	41" x 29" x 20"	4000w	7000w

**Warranty:** 1 year on workmanship, 2 years on the generator(s) & 10 years on the bondment of the transducers.

The benchtop models are the entry-level ultrasonic cleaning systems made of all stainless steel construction. They are available in various sizes and intended to sit easily on a workbench. The ultrasonic generator is provided as a separate unit and can be placed either on a shelf above or below it to conserve space. These units offer the same cleaning capabilities as the more elaborate models but at a lower price. They are great for cleaning small parts on an intermittent to semi-production basis but are not recommended for high volume cleaning.

powered by

generators.
