

BLACKSTONE-NEY ULTRASONICS TO SHOWCASE ADVANCED ULTRASONIC CLEANING SOLUTIONS AT IMTS 2026

Cincinnati, Ohio – August 2026 – Blackstone-NEY Ultrasonics, a division of Cleaning Technologies Group and a global leader in precision cleaning technologies, will showcase advanced ultrasonic cleaning solutions at **IMTS 2026**, September 14–19, 2026, at McCormick Place in Chicago, Illinois.

Visitors can meet the Blackstone-NEY Ultrasonics team at the **Cleaning Technologies Group Booth #338774** to explore innovative equipment, technologies, and services designed to improve cleaning performance, process consistency, productivity, and overall operating efficiency.

Aquarius™ Multi-Tank Ultrasonic Cleaning Systems

A key highlight at IMTS will be the **Aquarius™ Series Multi-Tank Ultrasonic Cleaning System**. Aquarius systems integrate ultrasonic cleaning with rinsing, drying, and additional processing stages into a unified system designed to provide exceptional process control and repeatable cleaning results.

Aquarius systems can be configured with advanced features including automated robotic part transfer, environmental enclosures, filtration, DI water systems, and specialized process stages. These capabilities help manufacturers achieve demanding cleanliness requirements while reducing manual handling and improving process consistency.

The Aquarius platform can also be configured for applications requiring **nitric or citric acid passivation**, providing manufacturers with a flexible cleaning solution that can be tailored to specific production and cleanliness requirements.

Meet with Our Cleaning Experts at IMTS

Attendees are encouraged to **schedule an appointment in advance** to meet one-on-one with Blackstone-NEY Ultrasonics cleaning specialists at Booth #338774.

Whether you are evaluating a new ultrasonic cleaning system, looking to improve an existing cleaning process, or have a challenging precision-cleaning application, our team will be available to discuss your requirements and recommend the right solution.
